Please note: Your product may differ from the image on the front cover.
1.1. Legs
- Place the BBQ unit on its back on a level surface.
- The legs, with the threaded holes on the bottom of the leg, must be attached to the right hand side of the BBQ (the right when facing the front of the BBQ) (see Fig.1).
- When attaching the legs ensure that the 2 threaded holes on the side of the leg face forward on front legs and backward on back legs (see Fig.2).
- Align the spacer with the corresponding holes on the leg.
- Place the spacer between the leg and the body of the BBQ (see Fig. 3).
- Using M6 x 70mm screws fasten the leg and spacer to the BBQ.
- Do not fully tighten screws.
- Repeat above on remaining legs.

1.2. Bottom Panel
- Fasten the bottom panel to the legs by aligning the holes on the legs with the holes on the bottom panel, Fasten with four M6 x 12mm screws (see Fig.4).
1.3. Wheels
- The small castor wheels screw into the bottom of the right legs. Fit the small castor wheels by aligning the screw on the wheel with the hole underneath the leg. Holding the wheel steady, turn the nuts until securely attached (see Fig. 5).
- The large wheels should be attached to the left legs. Push the axle through the wheel and then the corresponding hole at the bottom of the left leg. Fasten with the nuts supplied with the axels (see Fig. 6).
- Fit the grey plastic wheel hub covers by clipping one onto each wheel (see Fig. 7).
- Lift the BBQ upright.

1.4. Cylinder support
- Fit the cylinder support to the left legs by using the M6 x 12mm screws supplied (see Fig. 8).

1.5. Front panel
- Fit the front panel to the front legs by aligning the holes in the front panel with the holes in the front legs. Fasten with four M5 x 10mm screws (see Fig. 9).
1.6. Cylinder hook
- Fit the cylinder hook to the body of the BBQ body by aligning the 2 holes on the hook with the holes on the side panel of the BBQ body. Fasten with two M6 x 12mm screws and M6 nuts (see Fig.10).

![Figure 10](image)

1.7. Side Tray
- Fit the side tray to the right hand side of the frame using four M6 x 12mm screws (see Fig.11).

![Figure 11](image)

1.8. Side Burner
- Fit the side burner to the left hand side of the frame using four M6 x 12mm screws (see Fig.12).

![Figure 12](image)
1.9 The BBQ
- Fit the drip tray by sliding it into the BBQ from the rear (see Fig. 13).
- Slide the oil catcher into the bracket underneath the drip tray (see Fig. 14).
- Place the flame tamers over each burner (see Fig. 15).
- Fit the grill plates inside the BBQ body (see Fig. 16).
- Fit the warming rack to locators inside the BBQ body at the top (see Fig. 17).
1.11 After Assembly

- After assembly, go back and tighten all fastenings, remembering to tighten the screws on the legs.

1.12 Connecting the Gas Supply Hoses

- Before connecting any hoses, ensure that the black rubber seal on each nozzle is intact and not damaged in any way (see Fig. 18).
- Connect the regulator pipe to the downward-facing gas nozzle under the BBQ unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak.

NOTE! INLET GAS NOZZLE MAY DIFFER FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
2 Assembly Instructions - 98345

Please Note: Your product may vary from the illustrations

2.1. Legs
- Place the BBQ unit on its back on a level surface.
- The legs with the threaded holes on the bottom of the leg must be attached to the right hand side of the BBQ (the right when facing the front of the BBQ) (see Fig.1).
- When attaching the legs ensure that the 2 threaded holes on the side of the leg face towards each other (see Fig.2).
- Align the spacer with the corresponding holes on the leg.
- Place the spacer between the leg and the body of the BBQ (see Fig.3).
- Using M6 x 70mm screws fasten the leg and spacer to the BBQ.
- Do not fully tighten screws.
- Repeat above on remaining legs.

2.2. Bottom Panel
- Fasten the bottom panel to the legs by aligning the holes on the legs with the holes on the bottom panel, Fasten with four M6 x 12mm screws (see Fig.4).
2.3. Wheels
- The small castor wheels screw into the bottom of the right legs. Fit the small castor wheels by aligning the screw on the wheel with the hole underneath the leg. Holding the wheel steady, turn the nuts until securely attached (see Fig. 5).
- The large wheels should be attached to the left legs. Push the axle through the wheel and then the corresponding hole at the bottom of the left leg. Fasten with the nuts supplied with the axles (see Fig. 6).
- Fit the grey plastic wheel hub covers by clipping one onto each wheel (see Fig. 7).
- Lift the BBQ upright.

2.4. Cylinder support
- Fit the cylinder support to the left legs by using the M6 x 12mm screws supplied (see Fig. 8).

2.5. Cylinder hook
- Fit the cylinder hook to the body of the BBQ body by aligning the 2 holes on the hook with the holes on the side panel of the BBQ body. Fasten with two M6 x 12mm screws and M6 nuts (see Fig. 9).
2.6. Side tray

- Screw one stepped M6 screw into the upper threaded insert on the inside face of each leg (see Fig.10).
- Hook the side tray onto the two fitted stepped M6 screws and align the slots on the tray bracket with the remaining holes on the legs (see Fig.11). Fit the side tray to the frame by screwing two stepped M6 screws into the bottom holes (see Fig.12).
- For storing purposes, the side trays can be folded down by lifting them up over the top screws. This will allow for the side tray to swivel down.

2.7. The BBQ

- Fit the drip tray by sliding it into the BBQ from the rear.
- Slide the oil catcher into the bracket underneath the drip tray (see Figs.13-15).
2.8. The BBQ ... continued
- Place the flame tamers over each burner (see Fig. 16).
- Fit the grill plates inside the BBQ body (see Fig. 17).

NOTE! GRID AND GRILL CONFIGURATIONS MAY VARY FROM ILLUSTRATION DEPENDING ON MODEL AND REGION

2.9. The BBQ ... continued
- Fit the warming rack to locators inside the BBQ body at the top (see Fig. 18).
2.10. After Assembly
- After assembly, go back and tighten all fastenings, remembering to tighten the screws on the legs.

2.11. Connecting the Gas Supply Hoses
- Before connecting any hoses, ensure that the black rubber seal on each nozzle is intact and not damaged in any way (see Fig. 19).
- Connect the regulator pipe to the downward-facing gas nozzle under the BBQ unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak.

NOTE! INLET GAS NOZZLE MAY DIFFER FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
3. Assembly Instructions - 98347 & 98350

3.1. Legs
- Place the BBQ unit on its back on a level surface.
- The legs with the threaded holes on the bottom of the leg must be attached to the right hand side of the BBQ (the right when facing the front of the BBQ) (see Fig. 1).
- When attaching the legs ensure that the 2 threaded holes on the side of the leg face towards each other (see Fig. 2).
- Align the spacer with the corresponding holes on the leg.
- Place the spacer between the leg and the body of the BBQ (see Fig. 3).
- Using M6 x 70mm screws fasten the leg and spacer to the BBQ.
- Do not fully tighten screws.
- Repeat above on remaining legs.

3.2. Bottom Panel
- Fasten the bottom panel to the legs by aligning the holes on the legs with the holes on the bottom panel, Fasten with four M6 x 12mm screws (see Fig. 4).

Please Note: Your product may vary from the illustrations.
3.3. Wheels
- The small castor wheels screw into the bottom of the right legs. Fit the small castor wheels by aligning the screw on the wheel with the hole underneath the leg. Holding the wheel steady, turn the nuts until securely attached (see Fig. 5).
- The large wheels should be attached to the left legs. Push the axle through the wheel and then the corresponding hole at the bottom of the left leg. Fasten with the nuts supplied with the axels (see Fig. 6).
- Fit the grey plastic wheel hub covers by clipping one onto each wheel (see Fig. 7).
- Lift the BBQ upright.

3.4. Cylinder support
- Fit the cylinder support to the left legs by using the M6 x 12mm screws supplied (see Fig. 8).

3.5. Front panel
- Fit the front panel to the front legs by aligning the holes in the front panel with the holes in the front legs. Fasten with four M5 x 10mm screws (see Fig. 9).
3.6. Cylinder hook
- Fit the cylinder hook to the body of the BBQ body by aligning the 2 holes on the hook with the holes on the side panel of the BBQ body. Fasten with two M6 x 12mm screws and M6 nuts (see Fig.10).

3.7. Side tray
- Screw one stepped M6 screw into the upper threaded insert on the inside face of each leg (see Fig.11).
- Hook the side tray onto the two fitted stepped M6 screws and align the slots on the tray bracket with the remaining holes on the legs (see Fig.12). Fit the side tray to the frame by screwing two stepped M6 screws into the bottom holes (see Fig.13).
- For storing purposes, the side trays can be folded down by lifting them up over the top screws. This will allow for the side tray to swivel down.

3.8. The BBQ
- Fit the drip tray by sliding it into the BBQ from the rear.
- Slide the oil catcher into the bracket underneath the drip tray (see Figs.14-16).
3.9. The BBQ... continued

- Place the flame tamers over each burner (see Fig. 17).
- Fit the grill plates inside the BBQ body (see Fig. 18).

NOTE! GRID AND GRILL CONFIGURATIONS MAY VARY FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
3.10. The BBQ ... continued
• Fit the warming rack to locators inside the BBQ body at the top (see Fig 19).

Figure 19

3.11. After Assembly
• After assembly, go back and tighten all fastenings, remembering to tighten the screws on the legs.

Figure 20

3.12. Connecting the Gas Supply Hoses
• Before connecting any hoses, ensure that the black rubber seal on each nozzle is intact and not damaged in any way (see Fig.20).
• Connect the regulator pipe to the downward-facing gas nozzle under the BBQ unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak.

NOTE! INLET GAS NOZZLE MAY DIFFER FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
4.1. Legs
- Place the BBQ unit on its back on a level surface.
- The legs, with the threaded holes on the bottom of the leg, must be attached to the right hand side of the BBQ (the right when facing the front of the BBQ) (see Fig. 1).
- When attaching the legs ensure that the 2 threaded holes on the side of the leg face forward on front legs and backward on back legs (see Fig. 2).
- Align the spacer with the corresponding holes on the leg.
- Place the spacer between the leg and the body of the BBQ (see Fig. 3).
- Using M6 x 70mm screws fasten the leg and spacer to the BBQ.
- Do not fully tighten screws.
- Repeat above on remaining legs.

4.2. Bottom and Top of Cupboard
- Using the two holes in the shelf, attach one magnet to the top of the bottom panel with two of the screws and two of the nuts supplied in the packet containing the magnets. The magnets (metal strips) must face forward (see Fig. 4).
- Using the two holes in the panel, attach the second magnet to the bottom of the top panel with the remaining two screws and two nuts supplied (see Fig. 5).

Please Note: Your product may vary from the illustrations.
4.3. Bottom and Top of Cupboard ..... continued

- Bottom shelf: fasten the bottom panel (magnet facing front) to the legs by aligning the holes on the legs with the holes on the bottom panel. Fasten with four M6 x 12mm screws (see Fig. 6).
- Top shelf: only fasten the front of the panel (magnet facing front) to the legs using two M6 x 12mm screws. Leave the back loose so the top shelf can swivel up and down (see Fig. 7).

4.4. Wheels

- The small castor wheels screw into the bottom of the right legs. Fit the small castor wheels by aligning the screw on the wheel with the hole underneath the leg. Holding the wheel steady, turn the nuts until securely attached (see Fig. 8).
- The large wheels should be attached to the left legs. Push the axle through the wheel and then the corresponding hole at the bottom of the left leg. Fasten with the nuts supplied with the axels (see Fig. 9).
- Fit the grey plastic wheel hub covers by clipping one onto each wheel (see Fig. 10).
- Lift the BBQ upright.
4.5 Cupboard
- Fit the back panel by aligning the steel tags with the corresponding cut-outs on the bottom panel (see Fig. 11).

4.6 Cupboard .... continued
- Swivel the top panel up and align the tags of the back panel with the cut outs on the top panel. Secure the top panel to the back legs with two M6 x 12mm screws (see Fig. 12).
- Fit the side panels by aligning the corresponding holes with the top and bottom panels. Secure with M4 x 10mm screws and nuts (see Fig. 13).
4.7 Cupboard ..... continued
- Fit the cylinder bracket to the left side panel with the M6 x 12mm screws and nuts (see Fig.14).
- Fit the door handles to the doors using screws provided in packet (see Fig.15).
- Push the doors into place by aligning the retractable hinges on the corner of the door with the holes in the top and bottom panels (see Fig.16).

4.8 Side Tray
- Fit the side tray to the right hand side of the frame using four M6 x 12mm screws (see Fig.17).
- Repeat above for the remaining side tray.
4.9. The BBQ
- Fit the drip tray by sliding it into the BBQ from the rear (see Fig. 18).
- Slide the oil catcher into the bracket underneath the drip tray (see Fig. 19).
- Place the flame tamers over each burner (see Fig. 20).

4.10. The BBQ ... continued
- Fit the grill plates inside the BBQ body (see Fig. 21).
- Fit the warming rack to locators inside the BBQ body at the top (see Fig. 22).

NOTE! GRID AND GRILL CONFIGURATIONS MAY VARY FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
4.11. After Assembly

After assembly, go back and tighten all fastenings, remembering to tighten the screws on the legs.

4.12. Connecting the Gas Supply Hoses

Before connecting any hoses, ensure that the black rubber seal on each nozzle is intact and not damaged in any way (see Fig. 23).

Connect the regulator pipe to the downward-facing gas nozzle under the BBQ unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak.

NOTE! INLET GAS NOZZLE MAY DIFFER FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
5. Assembly Instruction - 98522, 98523, 98349, 98352

5.1. Legs
- Place the BBQ unit on its back on a level surface.
- The legs, with the threaded holes on the bottom of the leg, must be attached to the right hand side of the BBQ (the right when facing the front of the BBQ) (see Fig.1).
- When attaching the legs ensure that the 2 threaded holes on the side of the leg face forward on front legs and backward on back legs (see Fig.2).
- Align the spacer with the corresponding holes on the leg.
- Place the spacer between the leg and the body of the BBQ (see Fig. 3).
- Using M6 x 70mm screws fasten the leg and spacer to the BBQ.
- Do not fully tighten screws.
- Repeat above on remaining legs.

5.2. Bottom and Top of Cupboard
- Using the two holes in the shelf, attach one magnet to the top of the bottom panel with two of the screws and two of the nuts supplied in the packet containing the magnets. The magnets (metal strips) must face forward (see Fig.4).
- Using the two holes in the panel, attach the second magnet to the bottom of the top panel with the remaining two screws and two nuts supplied (see Fig.5).

Please Note: Your product may vary from the illustrations.
5.3. Bottom and Top of Cupboard ..... continued

- Bottom shelf: fasten the bottom panel (magnet facing front) to the legs by aligning the holes on the legs with the holes on the bottom panel. Fasten with four M6 x 12mm screws (see Fig.6).
- Top shelf: only fasten the front of the panel (magnet facing front) to the legs using two M6 x 12mm screws. Leave the back loose so the top shelf can swivel up and down (see Fig.7).

5.4. Wheels

- The small castor wheels screw into the bottom of the right legs. Fit the small castor wheels by aligning the screw on the wheel with the hole underneath the leg. Holding the wheel steady, turn the nuts until securely attached (see Fig.8).
- The large wheels should be attached to the left legs. Push the axle through the wheel and then the corresponding hole at the bottom of the left leg. Fasten with the nuts supplied with the axles (see Fig.9).
- Fit the grey plastic wheel hub covers by clipping one onto each wheel (see Fig.10).
- Lift the BBQ upright.
5.5. Cupboard
- Fit the back panel by aligning the steel tags with the corresponding cut-outs on the bottom panel (see Fig. 11).

5.6. Cupboard ..... continued
- Swivel the top panel up and align the tags of the back panel with the cut-outs on the top panel. Secure the top panel to the back legs with two M6 x 12mm screws (see Fig. 12).
- Fit the side panels by aligning the corresponding holes with the top and bottom panels. Secure with M4 x 10mm screws and nuts (see Fig. 13).
5.7. Cupboard ..... continued

- Fit the cylinder bracket to the left side panel with the M6 x 12mm screws and nuts (see Fig.14).
- Fit the door handles to the doors using screws provided in packet (see Fig.15).
- Push the doors into place by aligning the retractable hinges on the corner of the door with the holes in the top and bottom panels (see Fig.16).

5.8. Side Tray

- Fit the side tray to the right hand side of the frame using four M6 x 12mm screws (see Fig.17).
5.9. Side Burner
- Fit the side burner to the left hand side of the frame using four M6 x 12mm screws (see Fig. 18).

5.10. The BBQ
- Fit the drip tray by sliding it into the BBQ from the rear (see Fig. 19).
- Slide the oil catcher into the bracket underneath the drip tray (see Fig. 20).
- Place the flame tamers over each burner (see Fig. 21).
5.11. The BBQ... continued

- Fit the grill plates inside the BBQ body (see Fig.22).
- Fit the warming rack to locators inside the BBQ body at the top (see Fig.23).

NOTE! GRID AND GRILL CONFIGURATIONS MAY VARY FROM ILLUSTRATION DEPENDING ON MODEL AND REGION

5.12. After Assembly

- After assembly, go back and tighten all fastenings, remembering to tighten the screws on the legs.

5.13. Connecting the Gas Supply Hoses

- Before connecting any hoses, ensure that the black rubber seal on each nozzle is intact and not damaged in any way (see Fig.24).
- Connect the downward-facing gas nozzle under the side burner to the gas nozzle under the BBQ unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak (see Fig.25).
- Connect the regulator pipe to the backward-facing gas nozzle under the side burner unit. Ensure that the fastenings are properly tightened using a spanner and that there is no leak (see Fig.25).

NOTE! INLET GAS NOZZLE MAY DIFFER FROM ILLUSTRATION DEPENDING ON MODEL AND REGION
